PROFESSIONAL SUMMARY

Junior Backend Developer with hands-on experience building and maintaining production features in Laravel (PHP), including routing, middleware, authentication, and Eloquent-based database relationships. Comfortable working across the stack, with practical experience adding dynamic, AJAX-driven front-end interactions using jQuery. Strong foundation in data structures, SQL databases, and clean, maintainable code, with a continuous-learning mindset focused on delivering scalable, high-performance web applications.

WORK EXPERIENCE

Junior Backend Developer — UKMC Global

April 2026 – Present

- Developed and maintained backend features for a Laravel-based web application, working across routing, middleware, controllers, and models within an MVC architecture.
- Implemented user authentication and login/authorization workflows to secure application access.
- Designed and managed relational database structures using Eloquent ORM, including one-to-one and one-to-many relationships between tables.
- Built a Student Portal module end-to-end: added and managed dynamic table fields and pages, and implemented toggle-status and delete actions for record management.
- Created dynamic, validated form fields to improve data accuracy and user experience during data entry.
- Used jQuery and AJAX to build asynchronous form submissions and interactive UI elements without page reloads, improving application responsiveness.
- Integrated SweetAlert notifications to provide clear user feedback on actions such as submissions, updates, and deletions.
- Collaborated with the development team on a live Laravel project, contributing to both backend logic and select front-end components.

TECHNICAL SKILLS

- Languages: PHP (Laravel), JavaScript (jQuery, AJAX), HTML5, CSS3, C, C++, Python, SQL, Assembly (x86, x64)
- Databases: Laragon, MySQL, SQL Server, Oracle, MS Access,
- Concepts: MVC Architecture, RESTful API Design, Authentication & Authorization, Database Relationship Design, Responsive Web Design
- Tools & Platforms: Visual Studio Code, Code::Blocks, Git, Github, Draw.io, Adobe Illustrator, Adobe Photoshop, Google Colab, MS Office (Word, Excel, PowerPoint)
- Operating Systems: Windows, Linux (Ubuntu)

ACADEMIC & PERSONAL PROJECTS

Laravel CRUD & User Management System — Individual Project

- Built a Laravel practice application covering student registration, recruiter/user management with document and bank-detail handling, and an AJAX-driven CRUD module with live search, pagination, and one-click status toggling, using jQuery, AJAX, and SweetAlert2 for notifications.
- **GitHub:** github.com/Sayed-73/laravel-crud-management-app

Multi-Vendor E-Commerce Platform — Team Project

- Built a multi-vendor e-commerce site with separate admin, vendor, user, and employee panels, covering order processing and product management.

Hospital Management System — Team Project

- Developed a management system covering staff records and attendance, medicine purchase and sales, and vendor, staff, and employee panels with order processing.

School Management System — Individual Project

- Built a management information system to support general administration, staff management, academics, student records, and accounts for an educational institution.

Face Detection System — Individual Project

- Implemented a facial detection system to identify human faces within digital images and video streams.

Driver Drowsiness Detection — Individual Project

- Built a car safety application to detect driver drowsiness and help prevent fatigue-related accidents.

E-Commerce Template Design — Team Project

- Designed a responsive front-end layout with shopping cart interactions for an e-commerce template.

Digital Banner Design — Team Project

- Designed digital banner graphics for websites, social media, and email campaigns to support engagement and brand awareness.

CERTIFICATIONS

- IT Support – Level 1, 2022
- Computer Operation – Level 1, 2022
- Consumer Electronics – Level 1, 2025
- Introduction to 2D Animation — Grameenphone Academy

EDUCATION

Bachelor of Science in Computer Science

University of Global Village (UGV), Barishal, Bangladesh | 2022 – 2026

Higher Secondary Certificate (HSC), Science

Govt. B.M. College, Barishal, Bangladesh | 2018 – 2020

Secondary School Certificate (SSC), Science

Technical School and College, Barishal, Bangladesh | 2018
